

# Operations Dashboard

**Instant visibility across your clinical engineering supply chain**

## Quality insights for your day-to-day operations

The PartsSource Operations Dashboard provides you with key insights so you can better plan and execute the day-to-day activities that help keep your team operating efficiently. This dashboard provides one centralized location to view quotes, approvals, open orders, exchanges, returns, and repairs.

## Real-Time Insights

See key supply chain activity across your organization. Real-time updates allow you to see what approval and return actions need to be taken. The centralized view limits the need for multiple tabs and search inquiries. Get the answers and insights you need on your team's activity with one click.

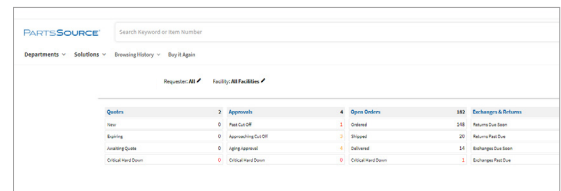

## Improved Reliability

Take the guess work out of day-to-day operations. With the Schedule view, get peace of mind knowing the status of your orders and what action steps you may need to take.

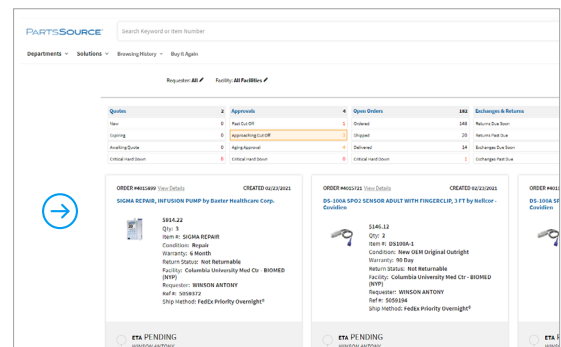

## Cost Savings

The exchange reminders ensure you are getting your items shipped out on time and not missing out on cost saving opportunities.

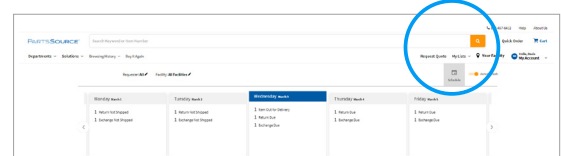

To open your Operations Dashboard, click on the link in the My Account drop down menu.

Click on a line listing in the dashboard and more details will appear.

Once the item is clicked on, more details appear. See status and if any action steps are needed.

Click on the schedule to view details about returns, exchanges and delivery dates.
